Tranquility Gel Overview

Natural TENCEL® Cover

- The cover offers unique moisture management properties. It's designed to be ultra soft for sensitive skin as well as naturally inhibiting bacterial growth.
- **TENCEL®** fabric is also an environmentally friendly/sustainable product.
- The mattress has a white top which extends over the sides of the mattress with an Ivory white cord around the border.

The sides have a cobalt blue microsuede cover for an elegant look and feel.

3" CoolRest® Gel Infused Memory Foam

- Advanced Gel infused memory foam helps you sleep cooler and provides improved pressure relief.
- Perfectly conforms to your body for a soft, yet supportive feel.
- Distributes and neutralizes pressure points to provide comfort and reduce tossing and turning at night for deeper, more restful sleep.
- Open cell structure increases air flow, making it breathable and cooler to sleep on.
- Reduces motion transfer, allowing you to move without waking your partner.

Rebounds (takes its shape) quicker than older types of memory foam, making it easier to change positions.

8" High Resiliency Support Foam

- Designed to support and correctly align your spine so you can relax at night and wake up pain free.
- Created to work in tandem with our CoolRest® memory foam and provide perfect support for consistent and long lasting comfort.
- More durable than conventional foams used by other companies.
- Accommodates any sleep position- back, side, & stomach.

The Tranquility Gel with Natural TENCEL® measures approximately 11 inches tall.

The **Tranquility GEL with Natural TENCEL®** mattress combines the comfort of **TENCEL®** fabric with our **CoolRest® Gel** memory foam for a mattress that is truly remarkable. **TENCEL®** fabric is known for its moisture management properties. The unique structure of the **TENCEL®** fiber allows it to actually absorb moisture inside the fiber and transport moisture throughout the fabric promoting faster evaporation. This also means that the fabric can naturally inhibit bacterial growth, for a healthier sleeping surface. These factors combined with the smooth surface of the fiber make this material a positive environment for healthy skin.

TENCEL® fabric is made from Eucalyptus trees utilizing an environmentally sustainable process. Since these trees grow quickly, they are rapidly replaced when cut. They also yield more fiber per square meter than conventional cotton, which makes this cover environmentally friendly.

This mattress has a medium/firm feel, but allows the memory foam to quickly conform to your body for pressure relief and support without sinking into the mattress too far.
